

GROVE COMPACT EUONYMUS

Euonymus alatus 'Grove Compact'

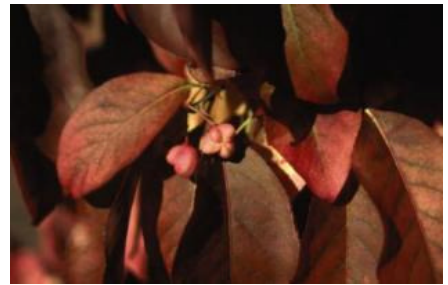

Height: 5-6' **Spread:** 6-8'

Location: Zone 3, sun to part shade, versatile

Shape: Mounded, compact, wings more pronounced

Foliage: Medium green, brilliant in fall

Notes: An improvement over the 'Dwarf Winged.' The wings are much more pronounced and the habit is mounded and compact rather than upright. Similar in form to 'Fireball,' but one zone hardier.

MOONSHADOW EUONYMUS

Euonymus fortunei 'Moonshadow'

Height: 2-3' **Spread:** 3-5'

Location: Zone 4, sun to part shade

Shape: Spreading, mounded

Foliage: Variegated green & yellow

Notes: Bright golden and green variegation is outstanding on this vigorous groundcover shrub. Spreading habit makes a highly useful, low maintenance filler for beds, along foundations, or for bank and slope coverage. Not particular about soil, provided it is well drained. Withstands heat and drought once mature.
