

QUAKING ASPEN

Populus tremuloides

Height: 50-75' **Spread:** 30'

Location: Zone 2, sun, tolerates wet or dry sites

Shape: Pyramidal to round crown

Foliage: Small, light green, yellow in fall.

Notes: An oval, medium sized tree known for its leaves which tremble in the breeze, excellent yellow fall color and white to gray-green bark. Pyramidal in youth becoming oval, loose, open, informal, sometimes irregular. Native across most of Canada and throughout the US from Alaska to Georgia; the most widely distributed plant in North America.
